78730, Saint Arnoult en Yvelines, France
35 years old

Driver's License: B - Owns a vehicle

Remote - IDF - Eure-et-Loir - Orléans -
Limoges - Lyon

Native French, English B1

SOFT SKILLS

- Problem-solving
- Intrinsic motivation
- Resilience
- Autonomy & Adaptability
- Effective communication
- Continuous learning

HARD SKILLS

Electron.js - Node.js Mastery

- Architecture, operation
- Inter-Process Communication (IPC)
- Window and event management
- Process management and security
- Packaging, distribution, certificates
- Modules, dependencies, web workers
- Asynchronous programming

JavaScript - TypeScript Mastery

- Vanilla, ES6, CommonJS
- Compilation, configuration

Web

- *Advanced* Streams, webRTC, websocket
- *Advanced* Protocoles (TCP/UDP/ICMP)
- *Advanced* ACK/SYN
- *Advanced* nmap, curl, BurpSuite
- *Basic* PHP

MERN Stack Mastery

- MongoDB, Mongoose
- Express.js, RESTful API, Middleware, Session, Authentication
- React.js, UI/UX, Hooks, State Management, Zustand, Redux, API Integration
- Node.js, Backend TS, Asynchronous Programming, Processes, Threads

Languages

- *Mastery* JS, TS, Node.js, Electron.js, HTML, CSS, DOM, jQuery, EJS
- *Basic* C, C++, ASM, Python, Rust

Others

- *Mastery* Photoshop, Illustrator
- *Advanced* Virtual machines, WSL, Docker
- *Advanced* IA prompt
- *Advanced* Logiciels collaboratif
- *Advanced* BIOS, Windows, Linux, Arduino
- *Basic* AHK, Blender, UnrealEngine
- *Basic* Blockchain, and Cryptocurrency Mining

PROFILE

With a background in print and web design, I am a fullstack Node.js developer with over 10 years of experience (MERN stack), specializing in the design of native software using Electron.js.

I enjoy creating my own tools and am passionate about research and development. I love solving complex problems and creating custom solutions to meet clients' specific needs.

Autonomous and very curious, I am interested in cybersecurity, hardware, and, more generally, the beneficial contribution of IT to humanity.

EXPERIENCE

Electron.js Consultant

2023-à ce jour

Malt - LinkedIn - Upwork - Freework - Confondateur.fr

As a consultant, I provided advice and worked on short- to medium-term projects involving Electron.js and/or Node.js.

These projects required close collaboration with technical and project management teams to meet the specific needs of each client.

Développeur d'application

2023-2024

PlayAbility - Valentin Squirelo

- Conducted various interventions including adding features to the existing application and performing security audits/interventions.

Application Developer

2021-2023

Vaniti

- Redeveloped the proprietary Electron.js application "OnlyOne," which unifies the launchers of various game distribution platforms (Steam, Blizzard, etc.) into one, adding a social dimension (chat, groups, etc.) using the MERN stack.
- Connected to relevant services (API).
- Backend development (RESTful).
- Used Webpack, React, MongoDB, Express.
- Shell scripting, machine integration.
- Integration, Design, UI, UX.
- Team management.

3D Voxel Artist

2020-2021

The SandBox

- Created 3D voxel assets (NFTs) for The SandBox "Creator Fund" using their proprietary VoxEdit software.
- Conducted modeling and texturing according to imposed constraints.
- Worked in an international environment (communication in English), with exposure to blockchain, NFTs, and cryptocurrencies.

Frontend Web Developer

2018-2020

Geoflex

- Designed and implemented a Node.js web application to interact with the company's GNSS augmentation service boxes.
- Dealt with hardware constraints and utilized vanilla JavaScript.

EDUCATION

- CAP DECG
- Multimedia Prep
- Wild Code School
- Self-taught
